

BITUTHENE[®] 4000

Self-adhesive waterproofing membrane with enhanced bonding characteristics for use with B2 moisture tolerant primer

Product Description

BITUTHENE[®]4000 is a flexible, preformed waterproof membrane combining a high performance, cross-laminated, HDPE carrier film with a unique, super sticky, self-adhesive rubber bitumen compound.

Ancillary Products

Primer B2

Primer B2 is used to prepare vertical and sloping surfaces and suspended slabs. It is moisture-tolerant and can be used on “green” concrete or damp-to-touch substrates.

Bituthene LM

Waterproof continuity at angles and at penetrations is provided by Bituthene LM two-component, chemically-curing, liquid-applied waterproof membrane..

Bituthene Protection Board

Damage from following trades and backfill is prevented by Bituthene Protection Boards. Located with BitustikTM 4000 double-sided tape.

Product Advantages

- **Cold-applied** — simple application to substrates especially at low temperatures.
- **Suitable for application to “green” concrete** — reduces programme schedules.
- **Moisture-tolerant primer system** — allows application in damp or marginal weather conditions.
- **Wide application temperature range** — excellent bond to self and substrate from -10°C to +35°C.
- **Overlap security** — enhanced bond provides additional security.
- **Cross-laminated high density polyethylene carrier film** — provides high tear strength, puncture and impact resistance.
- **Flexible** — accommodates concrete shrinkage cracks.
- **Gas-resistant** — methane, carbon dioxide and radon gas protection in excess of the standard membrane requirements in BRE Reports 211 (radon) and 212 (methane and carbon dioxide).

Supply

Bituthene 4000

	1m x 20m roll (20sq m) 30 cartons/pallet Weight 32kg
Palletisation	15 rolls per pallet
Storage	Store upright in dry
Primer B2	5, 25 litre drums
Coverage	10 - 12sq m / litre depending upon method of application, surface porosity and ambient temperature

Ancillary Products

Bituthene LM	5.7 litre packs
Bituthene Protection boards	3mm x 1m x 2m
Adcor 500S	6 x 5m rolls
Bitustik 4000	150mm x 12m roll
Lap Roller	Unit
Hydroduct	See separate drainage sheets

Bituthene 4000 should be brushed onto the surface to ensure good initial bond and exclude air. Adjacent rolls are aligned and overlapped 50mm minimum at side and ends and well rolled with a firm pressure, using a lap roller to ensure complete adhesion and continuity between the layers. On high walls it may be necessary to batten fix the membrane to prevent slippage.

Repairs

Damaged areas to be repaired by patching with an oversize patch applied to a clean dry surface and firmly rolled.

Typical ground level termination detail

Typical ground level termination detail

Installation

At air temperatures below +4 °C measures should be taken to ensure that all surfaces are free from ice or frost. All surfaces except those below ground bearing slabs and PREPRUFE®R membranes should be primed with one coat of Primer B2 applied at a rate of approx. 10m² / L. Bituthene 4000 shall be laid by peeling back the protective release paper and applying the adhesive face onto the prepared surface, free from ice, frost, condensation or any contaminants which could adversely effect adhesion. Bituthene LM to be applied at all internal and external corners, penetrations etc. prior to applying the overall membrane.

Details shown are typical illustrations only and not working drawings. For assistance with working drawings and additional technical advice please contact your local GCP representative

Physical Properties

PROPERTY	TYPICAL VALUE	TEST METHOD
Elongation at max load	Long 244% Trans 185%	BS 2782 320 A
Tear resistance	Long 77N Trans 92N	MOAT 27:5.4.1
Peel strength	76.5N / mm ²	MOAT 27:5.1.3
Tensile strength of joints	117N	MOAT 27:5.2.2
Moisture vapour permeability	0.31g / m / 24 hours	BS 3177: 1959 (75% RH/25oC)
Puncture resistance	220 N 65mm	ASTM E154
Water resistance (6m head)	No penetration	MOAT 27:5.1.4
Environmental resistance	Conforms	ASTM D543

Performance

Bituthene 4000 complies with the relevant section of the following national standards:

BS 8102:1990, Building Regulations (England and Wales) 1991 (amended 1994) clause C4. Building Regulations (Northern Ireland) 1994 (amended 1995) clause B2. Building Standard (Scotland) Regulations 1990, Regulation B2.1, G2.6.

Health and Safety

There is no legal requirement for a Material Safety Data Sheet (MSDS) for Bituthene 4000, Bituthene Protection Boards, Bitustik, Lap Roller, Hydroduct or waterstops. For health and safety questions on these products please contact GCP Applied Technologies.

For Primer B2, and Bituthene LM read the product label and MSDS before use. Users must comply with all risk and safety phrases. MSDS can be obtained from GCP Applied Technologies.

Pipe through wall detail

- 1 Bituthene 4000 on Primer B2
- 2 Bituthene LM
- 3 Adcor 500S
- 4 Bituthene Protection Board
- 5 Hydroduct 220

NBS Specification Clause

Refer to Clause 180 and 190.
